

# The Tough Environments “PPA” (Portable Power Analyzer)

## Introducing the PQube3 Rugged with Cellular Modem

Service calls are expensive! So the last thing you need (or want) is to have to make multiple calls to service a power problem.

Get the PQube3 Rugged from **POWERetc** and keep yourself safe.

Optimized for remote monitoring of power, energy, and power quality, for indoor or outdoor locations. It is the most economical and efficient way to monitor power -- no special software is needed. The PQube3 Rugged is equipped with a built-in cellular modem. This time and labor-saving feature allows for remote setup to be performed and reports to be sent automatically by email.

## Get the Results You Need with Minimum Service Calls

### The **POWERetc** PQube3 Rugged Comes Complete with Voltage Probes and Pro-Flex Current Sensors

- Make just one trip to install and one trip to remove
- No trips required to service (retrieve data) or modify configuration
- “Call” the PQube3 from your desk to
  - download data
  - revise setup
  - confirm operation & configuration
